EDUCATION

Delhi Technological University, B-Tech in Software Engineering	New Delhi, India	GPA: 7.39/10.0	2021-2025
Sarvodaya Co-ed S S S Jai Dev Park, Class XII	New Delhi, India	Per: 82 %	2018-2019
Akash Model School , Class X	New Delhi, India	Per: 79.80%	2016-2017

EXPERIENCE

Echiofy Pvt. Ltd. , *Software Engineer Intern* | Delhi , India June '24 – Jul '24

- Developed **search functionality** utilizing **ElasticSearch** to enhance the user experience by enabling quick and efficient **retrieval of influencers and brand deals based on keywords and filters**
- Designed and developed a comprehensive dashboard using React and **Syncfusion components**, including employee management, order tracking, customer pages, dynamic charts, and a **Kanban board** for efficient workflow management.

PROJECTS

BiteBridge: A Food Ordering Platform | *React.js, Node.js, MongoDB, Express*

- Implemented secure authentication with **bcrypt** and **jsonwebtoken**, along with **real-time payment** processing and **interactive cart** management. Developed comprehensive **order tracking and status updates** for a seamless user experience.
- Built an **admin panel** for managing food items, orders, and statuses, with functionalities to **add, update, and delete** items. Implemented **real-time order status** updates and frontend synchronization for seamless management.
- Integrated secure payment processing using the **Stripe API**, enabling **real-time transactions** and ensuring a seamless checkout experience.

CureConnect: Simplifying **Doctor Appointments with Ease.** | *React.js, Node.js, MongoDB, Express*

- Implemented Role-Based Access Control (RBAC)** using **JWT authentication** to define access levels for **Admin, Doctor, and Patient** users, ensuring secure data access and functionality.
- Developed an appointment management system** that enables patients to **book, view, cancel**, and reschedule appointments with real-time availability updates to **prevent double-booking**.
- Built doctor workflows for managing availability, **accepting/rejecting** bookings, and marking appointments as completed, with advanced filters by speciality. Integrated a payment system using **Razorpay** for secure appointment bookings.

Textura: An Innovative **Text-to-Image SaaS** Application | *React.js, Node.js, MongoDB, Express, API*

- Developed a secure **authentication** system using **JWT** for token-based user management, ensuring seamless **login and registration**. Utilized **localStorage** to persist user sessions, providing a consistent user experience across browser sessions.
- Enabled text-to-image functionality by integrating **Clipdrop's API**, allowing users to generate images from **text prompts** in real-time.
- Designed a dynamic credit system with **automated deductions** after image generation, granting access to **premium features**. Integrated **Razorpay API** for secure credit purchases and subscriptions, enhancing the payment experience.

SKILLS

Programming Languages	C/C++
Web Development	JavaScript , React.Js , Node.Js , MongoDB , HTML , Tailwind CSS
Developer Tools	Git, Github, VS Code, Postman, MongoDB Atlas.
Computer Subjects	DBMS, OOPs , Operating System

ACADEMIC ACHIEVEMENTS AND AWARDS

- Solved **700+ DSA questions** on coding websites such as **leetcode** , **geeksforgeeks** , **codingninjas**
- Completed **JavaScript Specialist Certification** on Udemy, demonstrating proficiency in JavaScript concepts, including **asynchronous programming**, and **DOM manipulation**.

POSITIONS OF RESPONSIBILITY

Volunteer , Desk Ke Mentor

- Mentored **four mentees**, **guiding them in exploring universities** and scholarship opportunities.

Coordinator, Yuvaan Society

- Led and organized film and literature events, fostering a vibrant cultural community.
