Education

Bhagwan Parshuram Institute Of Technology

Bachelor of Technology in Information and Technology

Sep. 2023 – May 2027

Rohini Sector-17 , New Delhi

Arwachin International School

CBSE : 10th - 96.4%

CBSE : 12th - 94.6%

2008 – April 2023

Dilshad Garden , New Delhi

Projects

TechHive: E-Commerce | *React, Redux, Firebase, Javascript, TailwindCSS, Context API, RazorPay*

🐙 Github

- Built a comprehensive E-commerce platform using React for the frontend and Firebase for the backend, delivering a dynamic user interface. Deployed the app on Vercel
- Implemented secure login, registration, and user session management using Firebase Authentication, supporting features like password recovery and social logins along with protected routes and admin dashboard.
- Designed a product catalog with filtering, searching, and sorting functionalities, enabling users to easily browse and find products. Leveraged Redux and Context API for efficient state management
- Integrated Razorpay as the payment gateway, facilitating smooth and secure transactions for purchases.

BudgetMap - Expense Tracker Web App | *MERN, Typescript, Tailwind CSS, Shadcn, Postman*

🐙 Github

- Developed a responsive expense tracking platform with React, TypeScript, and Tailwind CSS, featuring a dynamic dashboard for expense categorization and real-time budget visualization.
- Engineered a secure backend using Node.js, Express, and JWT authentication, enabling robust user management with registration, login, and profile handling.
- Implemented advanced functionalities such as multi-currency support with live conversion rates, automated recurring expenses, and data export in CSV/PDF formats.
- Optimized performance and scalability with MongoDB for efficient data storage, leveraging reusable components and modular design principles for streamlined development.

Recap: AI-Powered Study Companion | *React, Tailwind CSS, CohereAI, Firebase, JavaScript, Tesseract.js*

🐙 Github

- Developed an AI-powered note organization platform (hackathon winning project) using React and Tailwind CSS, featuring automatic categorization, customizable views, and flashcard generation.
- Integrated advanced tools such as OCR for handwritten note conversion, audio transcription for lecture recordings, and AI-driven insights to identify knowledge gaps and recommend resources.
- Integrated Firebase Authentication for secure user login via email, Google, and GitHub, with additional support for password recovery (forgot password).

Technical Skills

Languages: HTML/CSS, JavaScript, C, Java

Developer/Design Tools: VS Code, Figma, IntelliJ, Git and Github, Jira, Postman, Canva

Databases: MongoDB, MySQL

Technologies/Frameworks: NextJS, ReactJS, Redux, TailwindCSS, Bootstrap, Sass, Firebase, React Native, Appwrite, WordPress, MaterialUI

Backend Technologies: ExpressJS, NodeJS

Experience and Open Source Contributions

Web Developer Intern

November 2024 – Present

Eterna Infotech Pvt Ltd

- Enhanced MTS LMS website by improving both frontend and backend functionality using React, Sass, MUI, and MySQL. Actively collaborated with cross-functional teams, resolving bugs, implementing new features, and conducting thorough code reviews through Jira and GitHub.
- Optimized APIs with Postman and MySQL Workbench, ensuring smooth data flow and improved system performance.

Open Source Contribution

November 2024 – Present

Geek Room and Namespace BPIT

- Developed responsive React pages for both mobile and desktop views, collaborating with Figma for UI design, and contributed to the Geek Room community Pears hackathon website by enhancing functionality. Additionally, identified, troubleshooted, and fixed open issues on the Namespace GitHub repository, improving overall platform performance and user engagement.
